For Immediate Release

July 21, 2003

Christiansted, St. Croix - USVI - HealthQuest opened the doors of the Virgin Islands Kidney Center today at its new, free standing, location. The first kidney dialysis patient was treated and the new Virgin Islands Kidney Center is looking forward to serving many more patients in the days and months to come.

The Virgin Islands Kidney Center is a wholly owned subsidiary of HealthQuest, LLC, a Virgin Islands company. Its purpose is to provide comprehensive health care to patients who suffer from kidney disease in the relaxing, warm climate of the Eastern Caribbean.

The Virgin Islands Kidney Center is a freestanding medical facility that provides medical services to patients with renal disease. We are dedicated to the early diagnosis and treatment of the various kidney diseases and disease entities, which predispose to the development of kidney disease. The Virgin Islands Kidney Center recognizes that some patients will inevitably progress to end stage renal disease. Its commitment to the treatment of kidney disease necessarily dictates that care must extend to the care of patients who require renal replacement therapy. The facility provides both hemodialysis and peritoneal dialysis services in a comfortable, professional and friendly setting.
